Experience

07/2019-Now — **Lecturer Biomedical Engineering** — Biomedical Engineering, NUIG, Galway, Ireland
Responsibilities include teaching undergraduate/postgraduate modules (e.g. Comp. Methods in Eng. Analysis, and Advanced FEA), and supervision of (under)graduate students. Research: computational biomechanics and medical device optimization.

08/2018-Now — **Research Affiliate** — Biomechatronics, MIT Media Lab, Cambridge, MA, USA
Continued collaboration on computational mechanics and device design. Guidance and training of new staff for NIH RO1 clinical trial of prosthetic sockets.

08/2018-07/2019 — **Research Fellow** — Biomedical Engineering, NUIG, Galway, Ireland
The core research focussed on the development of computational tools for in-silico trials of mechanical thrombectomy. Other responsibilities include PhD student guidance and teaching of the module: *Engineering Analysis for Regulatory Approval*.

04/2017-08/2018 — **Research Scientist** — Biomechatronics, MIT Media Lab, Cambridge, MA, USA
Leader of the *Computational Biomechanics* research track, which focusses on the development of novel computational (and experimental) methods to study tissue biomechanics, and to design devices that interact with tissue. Responsibilities: grant writing, co-supervision of (under)graduate students.

09/2015-04/2017 — **Post Doctoral Associate** — Biomechatronics, MIT Media Lab, Cambridge, MA, USA
Development of a framework for automated design and optimization of subject-specific prosthetic sockets. Leader of the *Computational Biomechanics* research track. Responsibilities: grant writing, co-supervision of (under)graduate students.

01/2015-09/2015 — **Research Affiliate** — Biomechatronics, MIT Media Lab, Cambridge, MA, USA
Development of computational design methods for prosthetic devices. Co-supervisor and co-promotor for a PhD student.

04/2013-2018 — **Visiting Research Fellow** — University of Dublin, Trinity College, Dublin, Ireland
Collaboration on computational biomechanics, inverse finite element analysis, and the use of the GIBBON toolbox.

2011 - 2015 — **Post Doctoral Research Fellow** — Academic Medical Centre, Amsterdam, The Netherlands
Development of novel methods for non-invasive analysis of soft tissue mechanical properties (and pressure ulcers) based on inversion of Magnetic Resonance Elastography data, SPAMM tagged MRI, and inverse finite element analysis.

2003 - 2006 — **Design Engineer** — Lely Technologies N.V., Maassluis, The Netherlands
Design and development of agricultural robotic systems, e.g. a robotic feed pusher and a solar energy powered mobile feeding robot.

Education

08/2019-Now — **PgCert in Teaching and Learning in Higher Education** — NUIG, Galway, Ireland

05/2017-06/2017 — **Kaufman Teaching Certificate Program** — MIT, Cambridge, USA

02/2013-04/2013 — **Course: Advanced MR Physics** — Universiteit Utrecht, Utrecht, The Netherlands

08/2006-02/2012 — **PhD in Bioengineering** — University of Dublin, Trinity College, Dublin, Ireland
Thesis: *An Improved Framework for the Inverse Analysis of Skeletal Muscle Tissue In-vivo*

08/2008-08/2009 — **Postgraduate Diploma in Statistics** — University of Dublin, Trinity College, Dublin, Ireland

09/2006 — **Course: Advances in Continuum Mechanics** — Durham University, Durham, UK
Mathematics for Engineers EPSRC Summer School: *Advances in Continuum Mechanics, The Nonlinear Deformation of Solids*.

2004 - 2005 — **MSc in Bioengineering** — University of Dublin, Trinity College, Dublin, Ireland
Thesis: *A Finite Element Model of the Human Head to Predict and Analyse Brain Injury due to Blast-Induced Acceleration*

2000 - 2004 — **BEng in Mechanical Engineering** — The Hague University of Appl. Sciences, The Hague, NL
Major: *Product Design*. Final Project: *"The Design and Development of an Autonomic Solar Powered, Mobile Concentrate Feeding Robot for Cows"*.

Awards & Grants

2021 **Research grant: €265,532 (LERO/SFI Platform grant)** LERO SFI research centre
Moerman KM (PI), Margaria T.(PI), *An MDD Platform for Automated Computational Design and Optimization of Prosthetic Sockets.*

2017 **Research grant: $1,600,000 (R01 EB024531-01)** USA National Institute of Health
Herr HM. (PI), Moerman KM.(Key Person), *Computational Design, Fabrication, and Evaluation of Optimized Patient-Specific Transtibial Prosthetic Sockets.*

2013 **Research grant: €710,500 (STW 12398)** Netherlands Organisation for Scientific Research
Oomens C.(PI), Nederveen A. (PI), Moerman KM.(Key person), *Early diagnosis and prevention of pressure related deep tissue injury.*

2010 **Award: €1000 Engineers Ireland Biomedical Research Medal** Engineers Ireland
Awarded at the 16th Bioengineering in Ireland Conference. Paper: *Towards the Non-Invasive Determination of the Mechanical Properties of Living Human Soft Tissue.*

2009 **Award: Bioengineering in Ireland Bronze Medal** Royal Academy of Medicine Ireland
1st best paper at the 15th Bioengineering in Ireland Conference, Paper: *A validation method for motion tracking techniques based on tagged MRI.*

2005 **Award: €1000 Bachelor Thesis Prize** The Royal Netherlands Society of Engineers, KIVI
3rd prize best Dutch bachelor thesis: *The Design and Development of Autonomic Solar Powered, Mobile Concentrate Feeding Robot for the Australian Dairy Industry.*

Selected publications*

*full list available at end of CV or online through my ImpactStory and ORCID profile.

- Moerman KM et al., **Control of tension-compression asymmetry in Ogden hyperelasticity with application to soft tissue modelling**, *J.Mech.Behav.Biomed.Mater.*, 2016. **DOI**: 10.1016/j.jmbbm.2015.11.027. OPEN ACCESS LINK

Editorial board experience

01/2020-Now Academic Editor — PLOS ONE
04/2017-Now Section Editor — The Journal of Open Hardware
06/2016-Now Engrχiv co-founder, steering committee member — EngrXiv: The Engineering Archive
02/2016-Now Co-founder, Associate Editor in Chief — The Journal of Open-Source Software

Conference session and workshop organization

07/2022 Organizer of special session and workshop — ESMC 2022
09/2021 Organizer of workshop — CMBBE 2021
06/2021 Organizer of workshop — VPH 2021
09/2019 Organizer of special session and workshop — CMBBE 2019
07/2018 Organizer of special session and workshop — WCB 2018
08/2017 Organizer, host — MozillaScience Working Open Workshop Boston
09/2016 Organizer, host — Open Source Tools for Computational Biomechanics, IEEE Boston
10/2014 Committee member, organizer of special session and workshop — CMBBE 2014
07/2014 Organizer/chair for special sessions — World Congress of Biomechanics 2014
04/2013 Organizer/chair special session — CMBBE 2013

Extra-curricular activities

2019 Science outreach — PubhD Galway
2018-Now Open Science MOOC content and website developer — Open Science MOOC
2017-Now Developer of the Open Access Clinic website — Open Access Clinic

Published works

This section lists all scientific outputs which includes articles, pre-prints, data, software, hardware, and patents. The list is also available online through my ORCID and ImpactStory profile, the latter providing open access links.

Preprints

[1] Kevin Mattheus Moerman, Praneeta Konduri, Behrooz Fereidoonnezhad, Henk Marquering, Aad van der Lugt, Giulia Luraghi, Sara Bridio, Francesco Migliavacca, Jose Felix Rodriguez Matas, and Patrick McGarry. *Development of a Patient-Specific Cerebral Vasculature Fluid-Structure-Interaction Model*. type: article. engrXiv, Mar. 30, 2021. DOI: 10.31224/osf.io/qaujs. URL: https://engrxiv.org/qaujs/ (visited on 05/24/2021).

[2] Kevin Moerman, Kevin Moerman, David Sengeh, and Hugh Herr. *Automated and Data-driven Computational Design of Patient-Specific Biomechanical Interfaces*. 2016. DOI: 10.17605/OSF.IO/G8H9N. URL: http://doi.org/10.17605/OSF.IO/G8H9N.
